

## CONTEXT

The year 2020 brought unexpected challenges related to our society. We saw **an increasing importance of professionals in STEM fields** as scientists researched cure and vaccination, engineers helped provide protective equipment, and ICT services made sure people stayed connected and worked remotely. When it comes to STEM education, the **COVID-19 pandemic changed the way educational institutions worked** around the world. For a large part of the year, teachers and students were learning how to participate in their classes remotely.

To step up individual efforts and help those students and teachers participate in learning in an interactive way, while having a wide choice of different study materials in multiple languages, companies Amgen, IBM and Johnson & Johnson created an online learning platform – STEM@Home.

## ABOUT THE EVENT

### 1. Aim of the Event

In 2021, the Together 4 STEM companies want to take their collaboration beyond the website and work together on communication, engagement at the EU level and partnerships. Join us for this event to **hear first-hand what these companies find beneficial about this collaboration** and how you could join it.

### 2. Key learning points

- Learn about the unique corporate collaboration on STEM
- Discuss what practical steps are making this collaboration work
- Discover how you can take an active part

### 3. Who should join:

- Companies working on STEM programmes
- NPOs
- International organisations/associations/networks, non-profits and educational/youth institutions
