

CONTEXT

Decarbonisation, net-zero or carbon neutrality - today there are numerous concepts that describe business efforts to reduce emissions along supply chains in support of the Paris Agreement's target to achieve carbon neutral by 2050.

In their journey companies face different challenges:

1. Increasing requirements and expectations for businesses to reduce emissions and a broad landscape of initiatives and approaches to meet these.
2. Different maturities along supply chains and the need for new solutions.
3. Global supply chains spanning different actors and industries.

The purpose of this atelier is:

1. **To provide clarity:** Map existing upcoming regulatory trends, stakeholder expectations, initiatives and provide understanding for each company on the:
 - Stakeholder and regulatory expectations.
 - Existing initiatives, standards and approaches and their relevance for businesses.
 - Upcoming trends and standards.
2. **To share experiences**, successes and challenges with other member companies allowing you to advance your own agenda and get inspired for further action. The Atelier will also allow you to engage with experts from different companies to assess your current efforts against an ideal model for a decarbonisation journey.
3. **To set the scene for collaboration:** Exchange with peers across industries about challenges and collaboration potentials to scale up decarbonisation efforts.

ABOUT THE EVENT

This is a series of intertwined events, a so-called “atelier” with three sessions planned for 2021:

Session 1 - Decarbonising Supply Chains, 23rd June 2021

Map stakeholder expectations and challenges. Get insights from experts on the current & upcoming expectations on scope 3 emissions and discuss how to meet these, today and tomorrow.

Session 2 - Overcoming the Challenge of Decarbonisation, 21st September 2021

Address challenges practically: Learn more about leading practices and innovative approaches to identified challenges. Exchange on company strategies and best practice examples.

Session 3 - Scaling up Decarbonisation Efforts in the Supply Chain, 7th December 2021

Localise where more stakeholder collaboration is needed to scale up decarbonisation efforts, identify relevant actors and how a cross-industry collaborations could look like. Explore future collaboration opportunities between our members and other stakeholders.

Key learning points:

- Nurture a deeper understanding of current and upcoming decarbonisation frameworks, expectations and (legal) requirements.
- Get concrete ideas and solutions on the practical implementation.
- Explore how collaborative efforts can look like today and in the future.

Who should join:

- Procurement, sustainability/CSR, climate business experts (engaged in supply chain emission mapping and reduction efforts).
- Company practitioners that want to develop a deeper understanding and skills related to climate protection, especially through exchange with peers.
- Company practitioners that seek to engage in cross-sector initiatives and look for collaborative solutions.

SCHEDULE

TIME (CET)	SESSION	SPEAKER(s)
09:00 - 09:30	Welcome & Introduction <ul style="list-style-type: none"> • Introduction to the atelier and session overview Tour de table <ul style="list-style-type: none"> • Participant's introduction: role and activities on supply chain decarbonisation 	CATALINA PISLARU <i>Manager</i> CSR EUROPE
09:30 - 10:30	Expert Insights <ul style="list-style-type: none"> • The European Commission's Green Deal, position and upcoming legislation on climate • The "Fit-for-55-Package" (TBC) • The Science-Based-Target's net zero target and the criteria it will set out for companies (TBC) • Q&A 	LUCA DE CARLI <i>Head of Unit, Legal Affairs, Institutional Relations and Communication</i> DG CLIMA ANDREAS GRAF <i>Project Manager</i> AGORA ENERGIEWENDE EMMA WATSON <i>Senior Manager</i> <i>Net-Zero</i> Science Based Targets Initiative CDP
10:30 - 10:45	BREAK	
10:45 - 11:45	Challenges for supply chain decarbonisation <ul style="list-style-type: none"> • Exchange on upcoming legal requirements and stakeholder expectations • Mapping of company challenges for decarbonisation • Discussion 	CATALINA PISLARU <i>Manager</i> MARIANNE KROPF <i>Project Manager</i> CSR EUROPE
11:45 - 12:00	Wrap-up & Outlook	CATALINA PISLARU <i>Manager</i> CSR EUROPE

AGENDA

ATELIER- Decarbonising Supply Chains

23.06.2021, 09:00 – 12:00 CET
