The European SDG Summit

FOR CLIMATE ACTION & A JUST TRANSITION

11-14 OCTOBER 2021

The European Sustainable Industry Barometer

Assessing the maturity and integration of sustainability factors in European industry.

In collaboration with:

KEY TAKEAWAYS

#1 The foundations for progress are set – but a transformation is likely needed

Industry Federations have set foundations for progress on Europe's sustainability goals. However, a transformation towards being more “hands on” and “impact orientated” is needed if we are to achieve the objectives of the EGD and SDGs.

#2 Climate Action is happening – but in a fragmented manner

Companies are increasingly exposed to climate controversies but the fragmentation between leaders and laggards across European sectors appears large and concerning.

#3 Six years after their launch, a strategic approach on the SDGs remains hard to determine

V.E.'s data on the Sustainable Development Goals indicates that progress remains uneven and is not moving fast enough to meet the ambitious goals set by the UN for 2030.

[READ MORE](#)

“Any change by definition leads to winners and losers. To build a sustainable future we need to put people and planet first.

The system cannot stay as it is, but it does not need revolution, it needs reform and it needs the participation of everyone in society. This is what we are responsible for. This is what needs to happen, and with your help it can”.

Frans Timmermans, Executive Vice-President of the European Commission, at the inauguration of the Barometer on 11 October.

ABOUT THE BAROMETER

The European Sustainable Industry Barometer is the key benchmarking tool of the **European Pact for Sustainable Industry**.

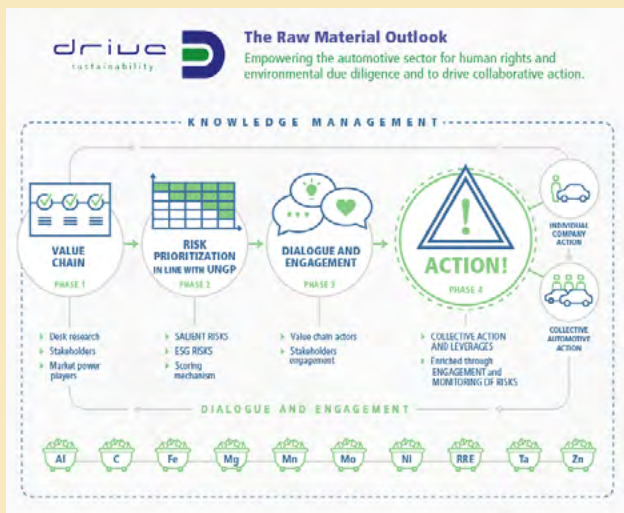

The Pact aims at scaling up the impact of individual efforts made by companies, industry federations, and EU leaders towards a Sustainable Europe 2030.

Two Major Initiatives Launched

THE PLATFORM RAW MATERIAL OUTLOOK

In collaboration with Levin Sources

Raw Material Outlook is the new platform launched by the leading partnership **Drive Sustainability** to help companies and stakeholders to manage and remediate Human Rights violations and the Environmental, Social, and Governance (ESG) impacts of materials used in the **automotive value chain**.

THE BLUEPRINT “COMPANIES FOR AN INCLUSIVE SOCIETY”

In collaboration with Enel and PwC Belgium

The pandemic has put the mental and physical well-being of the global workforce in jeopardy. In this context, some companies have assumed a leading position in protecting workers' health and well-being, promoting healthy and safe environments, and providing employees with additional and tailored support.

The **Blueprint “Companies for an Inclusive Society”** defines what companies can do practically to remain successful in the new normal and identify what is meaningful for its employees, communities, and stakeholders.

The document collects **reflections and recommendations from 14 different organisations** – Adecco, Enel, Engie, the European Trade Union Confederation, Hitachi, HP, IBM, the International Labour Organisation (ILO), Microsoft, Organisation for Economic Co-operation, and Development (OECD), SGI Europe (formerly CEEP), Sodalitas, Titan, TotalEnergies – on:

- **Well-Being**
- **Diversity and Inclusion**
- **People Growth.**
