

Context

After the first appointment of this project, CSR Europe is organising a series of two additional webinars to dig deeper on identifying the social implication generated by transitioning to a low-carbon economy, also in light of the global pandemic of COVID-19.

The second webinar of the series, **'A Just Transition to a Low Carbon and Inclusive Society – focus on Finance and Investment'** will take place on 23 June from 11:00 to 12:00 (Brussels time).

This webinar will focus on the topic of Investment and Finance.

Which are the main implications related to Financing a Just Transition? Which are their root causes? Which solutions can be developed at company and collaborative level?
