

Responsible & Transparent Tax Behaviour

Build Trust in Your Business

Our Service Offer to NPOs

About the Responsible & Transparent Tax Behaviour

Tax has become an unavoidable issue for companies.

It is not only relevant to ensure brand reputation and manage risks, but also to re-build trust in stakeholders. At the same time, tax is also a critical resource to reach the Sustainable Development Goals set by the United Nations, and showcase a company's commitment to the development of society.

Recognising the importance of scaling up corporate tax transparency, and establishing responsible tax behaviour, CSR Europe developed the **Responsible &**

Our Signature Approach

A PROVEN METHODOLOGY

CSR Europe developed the “*Blueprint on Responsible and Transparent Tax Behaviour*”, offering a one-stop shop to **improve your company's tax strategy** based on existing initiatives and best practices.

ACTION LEARNING

Participants will be requested to do some “homework” upfront.

As a result, **they will benefit from focused interactions during exercises and presentations**, tackling main challenges to SDGs implementation, current actions, and future ambitions.

THE POWER OF THE NETWORK

CSR Europe is able to reach out to experts relevant to your business, thanks to our **wide pan-european network**

Transparent Tax Behaviour Service for National Partner Organisations (NPOs) and their members.

CSR Europe will help members **assessing the level of transparency and responsibility of their tax behaviour, identifying gaps and areas of improvements in 6 thematic areas.*** As a result, members will build trust and address the growing expectations from the public and policy makers. Be amongst the first NPOs to change the European tax culture in the Business community of your country.

1 DAY

Our Successful Collaboration

**On the collaboration between
CSR/tax departments**

“The tax department engages internally, with Iberdrola’s CSR function, among others, to ensure the Corporate Tax Policy’s alignment with the company’s overall vision and values in the short, medium and long term.”

**On the disclosure of
information**

“BBVA believes that the Total Tax Contribution report enables all its stakeholders to have a good understanding of the company’s tax payments, that it represents a forward-thinking approach and shows BBVA’s commitment to corporate responsibility.”

**On rebuilding social trust
through transparency**

“Transparent communication on tax is important to build public confidence and can help restore trust in the tax system. Vodafone decided to take the approach of explaining its tax strategy, policies and contribution, publishing its first tax report in 2013, a report that detailed its payments to governments on a country-by-country and cash-paid basis.”
